

TRAINING RIG DIVISION

White Metal Bearing Scraping Rig Twin Blocks 1

Designed in partnership with EDF Energy

This rig is designed to give trainees the opportunity to scrape a pair of heavy walled white metal bearings out to fit a suitable shaft. It comes complete with:

- 8 x Special White Metal Bearing Shells (Ø108)
- 4 x Modified Bearing Housings
- 3 x 24" Long Hollow Shafts (Ø108) plus two other sizes to allow re-scraping of shells

The shafts will be driven by a manual crank handle to allow the trainee to safely turn the shafts in the bearings.

The assembly will be mounted on an aluminium 5 bar plate work surface.

Fitted onto a Beta Maxi Tank Trolley Mobile Workbench which is 800 MM wide. (Shown in photo on a Super Tank).
