

White Metal Bearing Scraping Rig Twin Blocks 2

Designed in partnership with British Energy

This rig is designed to give trainees the opportunity to scrape heavy walled white metal bearings out to fit a suitable shaft. It comes complete with:

- Bearing Shells free issue
- 4 prs x Modified Bearing Housings
- 3 x 24" Long Hollow Shafts

The shafts will be driven by a manual crank handle to allow a trainee to safely turn the shafts in the bearings. We will also supply 2 V-blocks which will hold one of the shafts securely while scraping.

The assembly will be mounted on an aluminium 5 bar plate work surface. Fitted onto a Beta C28N O Supertank Trolley Mobile Workbench which is 700 MM wide and can fit through most standard doors.
